US Export Value

The value of U.S. Electrical Machinery and Electronics exports to Canada in 2016 was \$18,579,681,000.

Canada and the U.S. share one of the largest trading relationships in the world, in part due to close cultural ties, and in part due to the North American Free Trade Agreement (NAFTA), which allows U.S. companies to ship qualifying goods to Canada or Mexico duty-free.
