

Country Name: Mexico
Immigration to the US at year 2012: 146406

Following its independence, immigration has been one of the primary sources of population growth and cultural change in the United States of America. Since the 1990s, Mexico and Latin America have become the predominant sources of immigration, surpassing all other countries in the world. This map records the immigration data to the United States of America from every country on the American continent between 2009 and 2018.

Immigration to the US from America Continent
